ORIGINAL UTICA FENCE PLIER and STAPLE PULLER

For METAL and WOOD POSTS

A favorite with farmers because no other tools are needed for building or repairing fences. The No. 1932 cuts, splices and stretches wire and is ideal for driving and pulling staples and post lugs.

The No. 1932 Utica Staple Puller has been designed to make fence erection and repair a one-man job. The wire cutting notches are large enough to cut through both strands of barbed wire in a single cut. The notches are put into the tool on an angle to give an easy cutting shear action. The point is tapered to permit removal of imbedded staples and steel post lugs quickly and easily.

PACK-A-SPAC — FOR CUTTING BX AND BXL, No. 12 and 14 — 2-3 WIRE CONDUCTOR

UTICA-SMITH POCKET ARMOR CUTTER

Drop-forged From Alloy Steel

None Genuine Unless Stamped "Spac" (Reg. U. S. Pat. Off.)
Pat No. 1,970,983

ADVANTAGES

The easiest and quickest tool made for cutting BX cable. It saves time and trouble, protects the insulation and cuts clean and easily. There are no sharp corners to nick wire or insulation.

The Utica-Smith Pocket Armor Cutter is light to carry and easy to handle. It has many uses, such as connecting up Cab. Boxes, switches, base plugs, and for splitting loom and rubber insulation. Handy for cutting metal lath and other light metal. Not intended to cut iron or steel wire.

It is indispensable for all electrical work.

HOW TO USE IT

OPERATION No. 1

Break armor thus where armor is to be cut

OPERATION No. 2

Hold armor firm in left hand, turn from you with right hand, raising loop as per arrow

OPERATION No. 3

Cut thus. Hold cutters and armor straight . . . No turning sideways

OPERATION No. 4

Remove armor and paper, crimp over lap of armor down to place

OPERATION No. 5

After use of crimper, place red fibre bushing into place, as inspectors require bushing

OPERATION No. 6

Under lap of armor, straighten up, cut, push under in place. Don't use crimper on under lap

No. 100BX

No. 91 Utica Adjustable Steel Wrench**THINNER — STRONGER****ALLOY STEEL**

The Utica thin pattern full Alloy Steel Wrench was designed by mechanics for mechanics to get at places inaccessible with an ordinary wrench of this type.

Note the wide bearing surface of the movable jaw resting on the frame. It gives greater support in any position, but particularly at the full opening of the Wrench, eliminating spring and unnecessary strain on the movable jaw.

The handle is designed to fit the hand in its natural grasping position and give perfect balance to the Wrench under pressure.

The jaws are thin, so thin that they will get into places difficult to reach with most Wrenches. Both the movable jaw and the frame are drop forged from tough Alloy Steel. They will withstand breaking tests that most Wrenches of this type cannot meet.
